

Dear Hiring Manager,

I am thrilled to apply for the Backend Engineer, Supply position at Vinted, where I can leverage my technical expertise to drive the company's mission of making second-hand the first choice. As a seasoned backend engineer with a passion for building scalable and reliable applications, I am confident that my skills and experience align with the requirements of this role.

With a strong background in Golang, I am excited about the opportunity to work on creating a Golang-based service that assists Vinted sellers in maximizing their use of the platform. My experience in collaborating with cross-functional teams, participating in code reviews, and providing mentorship to junior engineers will enable me to make a meaningful contribution to the team. I am also eager to work with a community of engineers who share knowledge, organize learning workshops, and engage in other enriching activities.

I am particularly drawn to Vinted's mission and the company's commitment to sustainability. As someone who believes in the importance of reducing waste and promoting circular economy, I am impressed by Vinted's efforts to give pre-loved items a new life. I am excited about the prospect of joining a team that shares my values and is dedicated to making a positive impact on the environment.

Thank you for considering my application. I would welcome the opportunity to discuss my qualifications further and explore how I can contribute to Vinted's success. Please feel free to contact me at asimbilal15@gmail.com or connect with me on LinkedIn.

Best regards,

Asim Bilal
