

Dear Hiring Manager,

I am thrilled to apply for the Backend Engineer position at Vinted, where I can utilize my technical expertise to support the company's mission of making second-hand the first choice. As a skilled backend engineer with a passion for building scalable and reliable applications, I am confident that I would be an excellent fit for this role.

With experience in developing Golang-based services, I am excited about the opportunity to work on creating a new service that assists Vinted sellers in maximizing their use of the platform. My expertise in migrating logic from legacy systems, developing new features, and maintaining existing ones aligns perfectly with the job requirements. I am also eager to collaborate with a cross-functional team of engineers to develop a scalable and reliable application that elevates member satisfaction and optimizes their experience on the platform.

As a seasoned engineer, I have a strong track record of providing mentorship and support to junior engineers, which I believe would be a valuable asset to the team. I am impressed by Vinted's commitment to knowledge sharing, learning workshops, and community engagement, and I am excited about the opportunity to be part of an active community of engineers who share my passion for learning and growth.

I am particularly drawn to Vinted's mission and values, and I am impressed by the company's growth and success. I am confident that my skills, experience, and passion for building innovative solutions make me an ideal candidate for this role. I would welcome the opportunity to discuss my application and how I can contribute to Vinted's continued success.

Best regards,

Asim Bilal
