

Dear Hiring Manager,

I am excited to apply for the Sr Software Engineer position at Weflow, where I can leverage my passion for solving complex engineering problems to drive revenue growth and predictability. With over 5 years of experience in software development and a strong background in React, Typescript, Node.js, and PostgreSQL, I am confident that I can make a significant impact at Weflow.

I am particularly drawn to Weflow's mission to help revenue teams run a repeatable, efficient, and predictable revenue process. My experience in building scalable and efficient software systems, as well as my expertise in Agile methodologies and CI/CD practices, aligns perfectly with Weflow's goals. I am also impressed by the company's use of AI to auto-capture and attribute data, provide insights, and run automations and alerts to drive sales performance.

As a seasoned software engineer with experience in cloud architecture and DevOps, I am well-equipped to lead the development of deep integrations and build complex AI-driven workflows. My experience working in SaaS product companies has also given me a solid understanding of software design patterns and architectural distributed computing principles. I am excited about the opportunity to work with a talented team and contribute to the growth and success of Weflow.

Thank you for considering my application. I am looking forward to discussing my qualifications further and learning more about the Weflow team. Please feel free to contact me at [asimbilal15@gmail.com](mailto:asimbilal15@gmail.com) or connect with me on LinkedIn at <https://www.linkedin.com/in/asim-bilal-0b8aa564/>.

Best regards,

Asim Bilal
