

Dear Hiring Manager,

I'm thrilled to apply for the Backend Engineer position at air up, where innovation and passion come together to create a truly unique experience. As a seasoned software engineer with a strong background in Kotlin and modern Java, I'm excited about the opportunity to join a dynamic team that shares my values and enthusiasm for good software design and engineering practices.

With over 4 years of experience in software development, I've honed my skills in building scalable and efficient backend services, and I'm confident in my ability to contribute to the evolution of air up's microservices-based platform.

My experience with agile, lean, and DevOps values and principles has taught me the importance of collaboration, continuous learning, and automation. I'm impressed by air up's commitment to automated testing and deployment, and I'm eager to contribute to the CI/CD infrastructure.

I'm particularly drawn to air up's culture, which emphasizes autonomy, purpose, and teamwork. As a strong team player with excellent communication skills, I thrive in dynamic and collaborative environments. I'm also comfortable working in a fully-remote setting and appreciate the opportunity for quarterly gatherings in Munich. My LinkedIn profile (<https://www.linkedin.com/in/asim-bilal-0b8aa564/>) provides more details about my experience and skills.

Thank you for considering my application. I'm excited about the opportunity to discuss my qualifications further and learn more about the air up team. Please feel free to contact me at asimbilal15@gmail.com.

Best regards,

Asim Bilal
