Dear Hiring Manager,

I am thrilled to apply for the Full Stack Software Engineer position at Miro, where I can leverage my passion for building user-centered experiences to drive user adoption and long-term engagement. With over 5 years of experience in developing full stack applications in modern product environments, I am confident that my skills and expertise align with the role's requirements.

As a seasoned full stack engineer, I possess strong proficiency in React and TypeScript, with extensive backend experience in Node.js. My product-focused approach has always been centered around delivering exceptional end-user experiences that drive business impact. I am excited about the prospect of collaborating with cross-functional teams to design and build the next generation of onboarding and user activation experiences at Miro.

I am particularly drawn to Miro's mission of helping users find value quickly and return often through thoughtful design, smart defaults, and personalized product journeys. My experience in designing systems that are easy to maintain and evolve over time, as well as my comfort working in fast-paced, collaborative environments, make me a strong fit for this role. I am impressed by Miro's commitment to engineering excellence and look forward to participating in architecture and code reviews to ensure quality and foster a culture of excellence.

Thank you for considering my application. I am eager to discuss my qualifications further and explore how I can contribute to Miro's mission. Please feel free to contact me at asimbilal15@gmail.com or connect with me on LinkedIn at https://www.linkedin.com/in/asim-bilal-0b8aa564/.

Best regards,

Asim Bilal
